

ECT100 FM VIDEO OPTICAL LINK

The ECT100 system provides high performance link for transmitting a unidirectional composite video signal over a fiber optic cable. The system features CCTV professional video quality and guarantees quality transmission of video signals with maximum bandwidth up to 14MHz.

The ECT100 transmitter/receiver are fully compatible with any ECT200 or ECT400 type systems allowing for mixed configurations when required.

The ECT100 utilizes linear frequency modulation and very low noise transmission technology to assure high quality and stability.
