

USR-4D

UNIVERSAL FOUR SLOT SUBRACK

FEATURES

- Dry Contact Alarm Output
- Accomodates up to Four Single Slot or Two Dual Slot Card
- LED Status Indicators
- External 12 VDC Battery Terminal Connector

The USR-4D is a universal subrack designed for small and flexible integration projects. The subrack accepts all Elcommtech's card style products.

The USR-4D subrack accommodates the following cards combinations:

- up to 4 single slot cards;
- up to 2 dual slot cards;
- up to 2 single slot and 1 dual slot cards.

The subrack includes the chassis with guides for cards and alarm/power entry section.

The USR-4D subrack is powered by external modular power supply which supports 100 – 240 VAC input.

The subrack has optional external battery backup. The alarm/power entry section provides integrated alarm facility which activates when one or more an alarm conditions occur on any of the installed cards.

The dry contact alarm output is provided for communicating the alarm condition to external devices.
